### Section I: General Overview and Next Steps

The Greek script community formed the Greek Script Generation Panel (GP), which developed a proposal for Greek Script Root Zone Label Generation Rules ([proposal](#) and [supporting document](#)). As per the [LGR Procedure](#), this proposal was posted for Public Comment to allow those who have not participated in the Greek Script GP to make their views known. Based on feedback received, the Greek Script GP will finalize and submit the proposal for integration into the Label Generation Rules for the Root Zone (RZ-LGR).

### Section II: Contributors

*At the time this report was prepared, a total of four (4) community submissions had been posted to the forum. The contributors, both individuals and organizations/groups, are listed below in chronological order by posting date with initials noted. To the extent that quotations are used in the foregoing narrative (Section III), such citations will reference the contributor's initials.*

#### Organizations and Groups:

Name	Submitted by	Initials
Latin Generation Panel	Mirjana Tasic	LGP
Armenian Generation Panel	Igor Mkrtumyan	AGP

#### Individuals:

Name	Affiliation (if provided)	Initials
Keolebogile Rantsetse		KR
Dušan Stojičević	Cyrillic GP Chair	DS

### Section III: Summary of Comments

***General Disclaimer:** This section intends to summarize broadly and comprehensively the comments submitted to this Public Comment proceeding but does not address every specific position stated by each contributor. The preparer recommends that readers interested in specific aspects of any of the summarized comments, or the full context of others, refer directly to the specific contributions at the link referenced above (View Comments Submitted).*

**LGP and AGP** studied the Greek LGR proposal and have no objection to the Greek GP Proposal with the understanding that some cross-script variants defined in the Greek LGR will produce more in-script variants in Latin LGR and Armenian LGRs as the result of transitivity. LGP and AGP will incorporate these in-script variants accordingly.

**KR** welcomes the proposal and notes that it corresponds to the LGR procedure and IDNA standard.

**DS** thanks the Greek Script GP for accomplishing the LGR proposal. **DS** agrees with the proposal in general but highlights that uppercase discussion is not included in other LGRs from other GPs. **DS** also notes that U+03BA (GREEK SMALL LETTER KAPPA, κ) and U+006B (LATIN SMALL LETTER K, k) are not defined as variant code points which seems to be inconsistent with other sets. For example: U+03C4 (GREEK SMALL LETTER TAU, τ) and U+0442 (CYRILLIC SMALL LETTER TE, т); U+03B1 (GREEK SMALL LETTER ALPHA, α) and U+0061 (LATIN SMALL LETTER A, a).

#### **Section IV: Analysis of Comments**

*General Disclaimer: This section intends to provide an analysis and evaluation of the comments submitted along with explanations regarding the basis for any recommendations provided within the analysis.*

These comments are being submitted to the Greek Script Generation Panel for their consideration and incorporation (as needed) in the Greek LGR proposal for the root zone. As per the [LGR Procedure](#), the Integration Panel will also review the input and work with the GP to address the comments following their analysis. The final version of the Greek LGR proposal for the root zone will be posted on the [RZ-LGR proposals page](#).
