

Board Risk Committee Activities 30 June through 31 December 2020

Section I: Completed Activities – First half of FY 2021

Item (as per BRC workplan)	Description	Committee Completion Date	Accomplishments/Outcome
A. Oversight of Risk Management			
Ongoing Risk Management: Review of Updates to Risk Register	The BRC received and discussed an update from ICANN org on changes made to the top risks in the ICANN Risk Register since the last BRC meeting.	31 August 2020	The changes to the top risks in the ICANN Risk Register presented to the BRC at this meeting reflect the results of ICANN org's annual evaluation, which generally lead to the addition of new risks, refining previously identified risks, and changing the rating of previously identified risks.
Oversight of Specific Risks: Update Threat Landscape Monitoring	The BRC received and discussed a presentation from ICANN org on its existential threat monitoring and the existential risks that have been included in the ICANN Risk Register. The Board had asked that existential threats that may impact ICANN's ability to ensure the security, stability, and resiliency of the domain name system and ICANN's governance, funding, and global relevance, be considered for ongoing strategic planning.	31 August 2020	The BRC is tasked with monitoring the threat landscape to identify such existential threats and, in support of that role, ICANN org's risk management function enhanced its risk identification procedure to do so.

Section II: Appendix – Resolutions Recommended by the BRC

ICANN Organization Risk Appetite Statement

Whereas, the ICANN Board previously recognized the benefit of and need for a Risk Management Framework to guide the ICANN organization in managing risks it faces.

Whereas, the ICANN Board previously set a target model for the Risk Management Framework including a Risk Appetite Statement.

Whereas, risk management involves the identification of vulnerabilities to the organization and therefore it would not be prudent to publish the Risk Appetite Statement.

Resolved (2020.12.17.09), the Board approves the ICANN Organization Risk Appetite Statement and directs the President and CEO, or his designee(s), to publish a summary of it.
