<center>**Amendment to Registry Agreements**</center>

THIS AMENDMENT ("Amendment"), effective as of _____ ("Amendment Effective Date"), is made by and between the Internet Corporation for Assigned Names and Numbers ("ICANN") and fTLD Registry Services LLC ("Registry Operator"), and shall amend the Registry Agreement for certain top-level domains ("TLDs") in the manner as further detailed and described herein.

WHEREAS, Registry Operator (i) is party to the Registry Agreements identified in Appendix I (each, a "Registry Agreement") and (ii) is the Registry Operator of those TLDs identified in Appendix I to this Amendment, which is attached hereto and incorporated herein; and

WHEREAS, in the interest of the mutual of convenience of the parties, in lieu of executing an individual amendment to the Registry Agreement for each individual TLD identified in Appendix I, the parties hereby desire to consolidate the modifications as provided in this Amendment.

NOW THEREFORE, the parties, intending to be legally bound, agree as follows:

1. Registry Operator represents it has proper authority to execute this Amendment for the purposes intended.

2. The Registry Agreement for those TLDs identified in Appendix I shall be amended in the manner set forth below as the amendment number provided in Appendix I.

3. The parties hereby agree to amend Exhibit A of each of the Registry Agreements identified in Appendix I by adding the following new text as a new section 5:

[START NEW TEXT]

"**5. Public Suffix Domain - Domain-based Message Authentication, Reporting & Conformance**

Registry Operator may implement the Domain-based Message Authentication, Reporting & Conformance ("DMARC") extension for Public Suffix Domains ("PSD") in the TLD's DNS service, as follows:

5.1 Registry Operator may activate, in the TLD's DNS service, the ASCII label "_dmarc" as owner of a DNS resource record of type TXT, class IN, and RDATA defining a PSD-DMARC policy (as described in RFC 9091).

5.2 Once Registry Operator has activated PSD DMARC as described above, Registry Operator must signal that the domain name is a public suffix domain name as described in Appendix B of RFC 9091 or as otherwise specified in future revisions to the method of signaling public suffix domain names in the DMARC standard.

5.3 Registry Operator may enable the reception of Aggregate Reports (as defined by Section 7.2 of RFC 7489) solely for the purposes of detecting abuse or threats, enforcing compliance with the DMARC requirement for domains under registration, and enhancing the overall security and stability of the TLD.

5.4 Registry Operator must not enable other types of reports (e.g., Failure Reports) defined in the DMARC standard (as defined in relevant RFCs).

5.5 Registry Operator must restrict access to data from Aggregate Reports to select staff of Registry Operator and external consultants or vendors on a need-to-know basis as part of Registry Operator's overall security and data privacy safeguards associated with this function.

5.6 Registry Operator must ensure that registrants are informed about the implementation of PSD DMARC no less than ninety (90) calendar days in advance.

5.7 Registry Operator will provide written notice to registrars about the implementation of PSD DMARC no less than one hundred twenty (120) calendar days in advance."

[END NEW TEXT]

Each party hereby acknowledges and agrees that this Amendment shall not be construed as a waiver of any provision of the Registry Agreements by any party hereto, nor shall it in any way affect the validity of, or the right of any party hereto, to enforce the provisions of the Registry Agreements. The parties agree that, except as set forth in this Amendment and any prior duly authorized and executed amendments, the current terms and conditions of each Registry Agreement will remain in full force and effect. All capitalized terms not defined will have the meaning given to them in each Registry Agreement. This Amendment may be executed in counterparts, each of which shall be deemed an original, and all of such counterparts taken together shall constitute one and the same instrument.

ACCEPTED AND AGREED:

INTERNET CORPORATION FOR ASSIGNED NAMES AND NUMBERS
