Amendment No. 2 to Registry Agreement

The Internet Corporation for Assigned Names and Numbers and Jolly Host, LLC agree, effective as of _____ ("Amendment No. 2 Effective Date"), that the modification set forth in this amendment No. 2 (the "Amendment") is made to the 08 January 2015 .safety Registry Agreement between the parties, as amended (the "Agreement").

The parties hereby agree to amend Exhibit A of the Agreement by adding the following new text as new sections 7, 8 and 9:

[START NEW TEXT]

" **7. Label Blocking Service**

Label Blocking is a service that allows rights holders to block certain labels from registration. The blocked domain names must comply with the provisions described in Specification 5, Section 3.3 of the Registry Agreement.

Domain names blocked by the Label Blocking Service will be either an exact match of a label or will contain an exact match of such labels, or may include domain names that are a misspelling of, or contain a misspelling of a label. Where two or more parties have verified rights for the same label or string, and one party wishes to unblock the label to register an associated domain name, approval will be required from the other rights holder(s).

8. Domains Protected Marks List (DPML)

The DPML is a service that allows trademark rights holders to block certain labels from registration across multiple TLDs operated by the Registry Operator. The blocked names must comply with the provisions described in Specification 5, Section 3.3 of the Registry Agreement. Domain Names blocked by the DPML service will be either an exact match of a label or will contain an exact match of such labels, or may include domain names that are a misspelling or contain a misspelling of a label. Blocked labels do not prevent other trademark rights holders or DPML holders from unblocking the label and registering the domain name. In some instances, approval from the applicable DPML holder may be required for a third party with the same trademark to register the blocked name.

9. Dropzone Service

Registry Operator may offer a Registry Service that will manage the release of domain names that have reached the end of their life cycle (such Registry Service, the "Dropzone Service").

There is a separate system, parallel to the main EPP system, that will manage, on a daily basis, the release of domain names that have been purged for a short period of time (such separate system, the "Dropzone" and such short period of time, the "Dropzone period"). Any ICANN-accredited registrar may use the Dropzone to register a recently purged domain name.

On a daily basis, at the end of the Dropzone period, Registry Operator will execute an awarding process, which will select, per domain name, the first domain creation request submitted on a first come, first serve basis."

[END NEW TEXT]

Each party hereby acknowledges and agrees that this Amendment shall not be construed as a waiver of any provision of the Agreement by any party hereto, nor shall it in any way affect the validity of, or the right of any party hereto, to enforce the provisions of the Agreement. The parties agree that, except as set forth in this Amendment and any prior duly authorized and executed amendments, the current terms and conditions of the Agreement will remain in full force and effect. All capitalized terms not defined will have the meaning given to them in the Agreement. This Amendment may be executed in counterparts, each of which shall be deemed an original, and all of such counterparts taken together shall constitute one and the same instrument.
