

**Comments from the Internet Infrastructure Coalition (i2Coalition)**  
on the Proposed GNSO Process for ICANN Board to Reverse Adoption of GNSO  
Policy Recs

The Internet Infrastructure Coalition (i2Coalition) supports the GNSO Council's proposal to establish a clear and documented process for circumstances in which the ICANN Board may reverse its adoption of GNSO policy recommendations. Providing procedural clarity in this limited and exceptional scenario strengthens the transparency and predictability of ICANN's governance framework while preserving the integrity of the Policy Development Process and the multistakeholder model.

Formalizing this mechanism in the PDP Manual and GGP Manual helps ensure that any such action by the Board is grounded in defined process, accountability, and community trust, and is applied consistently when reversal is contemplated. It contributes to the long-term stability and credibility of Internet governance.

**All the best,**
